

## Tech Gurukul Launches Advance Diploma in Networking Security

New Delhi, India, 01,Oct,2009:

Tech Gurukul known for providing training and education in IT/Telecom has launched yet another career oriented course. ADNS (Advance Diploma in Networking Security) an advance level course in IT, students who have completed their 12<sup>th</sup>, Graduation and even diploma holders are eligible for this course.

This is yet another step taken by Tech Gurukul into imparting advance level education that would enhance the prospects of students in IT sector. The curriculum includes; Infrastructure Management, Storage Management and Advance level Routing. Realizing that this plays a major role in IT, this course is launched to help a student gain a thorough knowledge in this subject. It is segregated into 4 modules that are designed to prepare a student for a definite track. It enables in development of skills that are required to attain job right after the 1<sup>st</sup> module completion, from there on routing towards the advance level to climb high in IT Network Industry.

Apart from this the Curriculum also prepares candidates for various Certifications like MICROSOFT certification- MCTS, MCSE, Cisco – CCNA, CCNP, COMPTIA – A+ , N+ , RED HAT LINUX – RHCE and many more.

Tech Gurukul is not just another institute, it stands apart from others; the reason being a Unit of RT Outsourcing Services Limited (RT), leader in after sales support in IT/Telecom. Working for Fortune 500 companies like HP, Lenevo, Nokia Siemens Network, Ericsson, and many more. Tech Gurukul has Industry Expertise which it shares with Students to give them real life experience, the students also get a chance to work with RT.

Now learning the latest in IT sector and hands on experience is much easier to gain for anyone who wishes to pave a career path in this particular direction.
